January 16, 2023

Dear Parents or Guardians,

This year, we will be hosting a joint Science/Heritage Fair. Please find the registration form for both fairs attached to this letter. The form must be **fully completed** (please ensure that **all** information is indicated on the form, ie: full name, teacher's name, title of project, etc.) and returned to school by **Thursday, January 26th** for your child to participate in the fair.

The Heritage Fair is a multi-media program designed to increase awareness and interest in Canadian history. It is like the traditional Science Fair. The projects are centered on topics in social studies, language arts, math and science, technical studies, music, and art but must be based on some aspect of **Canadian history**. The students can use a variety of media to present their topic.

The Science Fair exhibits should illustrate original scientific research, a scientific principle, process, application, technique, collections, or inventions. Areas of investigation could be, but are not limited to, plant growth studies, animal observation studies, product testing, energy studies, inventions, psychology or the physical world.

The Agnes Davidson Science/Heritage Fair will be held from **March 7th to 10th** during which both the science and heritage projects will be on display at the school. Students who choose to participate in the fairs will be given a handout of rules and guidelines. Participation in both the Science Fair and the Heritage Fair is optional for students in Grades K-5. Dates for the 2023 Regional Science (Sci-Fusion) Fair have not been released. Families wishing to have their child participate in this event can keep their eyes peeled on their website for more information <http://www.satelethbridge.ca/index.asp>

Yours sincerely,

The Science/Heritage Fair Committee

Science Fair Registration Form

Student Name: _____

Grade: _____

Teacher: _____

Parent Signature: _____

Parent Email: _____

Please indicate if you will be doing a project on your own or in a group.
