

# Has your child had their annual eye exam? It's important to do before they start school!

## Eye See...Eye Learn™

is a program that provides kindergarten-aged students with a comprehensive eye exam from an optometrist. There is Alberta Health coverage towards your child's eye exams up to age 19. **If required, kindergarten-aged students also receive a free pair of eyeglasses.**

## How kindergarten-aged students participate

**Step 1** Parents can find a participating optometrist at [optometrists.ab.ca](http://optometrists.ab.ca). Click on Find an Optometrist and **Eye See...Eye Learn™**, then enter your postal code to find a doctor close to you. **Call and book an appointment.**

**Step 2** See your optometrist for the eye exam. Have your health card ready. There is **Alberta Health coverage towards your child's eye exams up to age 19.**

**Step 3** If required, kindergarten-aged students will **receive a free pair of eyeglasses.** Ask to see the frame selection available. The optometrist will order your glasses for you.

**\*Free glasses are covered by a one year manufacturer's warranty.**

## Who can participate?

**Eye See...Eye Learn™** is available to all **kindergarten-aged students** in Alberta. It's important to address eye health and vision problems before children begin school.

Children are eligible from August until they begin grade one.

## Eye exam coverage

There is Alberta Health coverage towards your child's eye exams up to age 19. It's a painless, non-invasive process that could change their lives!

## Did you know?

- 80% of learning is visual.
- 1 in 4 school-aged children has a vision problem.
- An eye exam detects health problems such as crossed eyes or lazy eye.
- Children with vision problems are often misdiagnosed as having learning or behavioural disabilities.
- The earlier an eye health or visual problem is identified, the more likely it can be corrected.
- Children often don't know they have a vision problem, as they believe what they are seeing is normal.
- It is not uncommon for parents to believe they would know if their child has a vision problem, because these issues can be hard to spot particularly if there is a problem in only one of the eyes.

## What is an optometrist?

Your optometrist (doctor of optometry) is a primary source for all your vision, eye health and eyewear needs. They have the knowledge, tools and equipment necessary to diagnose, treat, prescribe medications or refer to a specialist, if needed.

# How well can your child see?

Eye See...™  
Eye Learn!

You can't see the world through your child's eyes, but your optometrist can. During your child's eye exam, your optometrist will assess:

- Visual acuity (how well they can see)
- Lazy eye, crossed eyes
- Nearsightedness, farsightedness, astigmatism
- Colour vision
- Eye coordination, tracking and depth perception
- Eye health
